NEW COLORADO REGULATION REDUCING OZONE POLLUTION FORMATION FROM LAWN AND GARDEN EQUIPMENT

REGULATION 29

What does the Ozone Act do?

The act restricts the use of handheld and push gasoline-powered lawn and garden equipment of 10 HP or below for local, state, and federal governments only during summer months. Summer is the season when ground-level ozone pollution formation is highest.

The State of Colorado has accepted AIS for a tax credit which allows us to provide a **30% discount** at the time of purchase on all eligible electric lawnmowers, leaf blowers, snow blowers, and trimmers. We carry top requested brands in this equipment including STIHL, DeWalt, and Milwaukee.

We Carry Brands You Trust

AIS is a factory authorized warranty and repair center for these manufacturers at our in service department.

The Ozone Act Applies to Federal Agencies, Counties, Cities, Local Governments, and Special Districts

- Only in the ozone non-attainment area.
- Only for equipment 10 horsepower or below.

**30% Discount Applied

Reasons for switching from gas to battery powered equipment other than ozone reduction

Longer Life

- Most gas-powered equipment has a 90 day warranty.
- Most battery powered has a minimum 2 year warranty.

More Power

- Gas powered equipment loses 3% of power for every 1,000 feet of altitude, so at 5,280 feet you start with 15% less power.
- Battery powered equipment maintains full power regardless of the altitude.

Reduced Noise & Vibration

- Start work earlier in the day.
- Longer field time & less fatigue.

Safety

- Safer than transporting gasoline filled containers.
- No chance for equipment damage from the mixture of gasoline and oil not being correct.

Repair Don't Replace - Be Sustainable!

AIS's Tool Repair Division is a factory certified repair shop for multiple brands including Stihl, Milwaukee, and Ridgid.

STIHL®

DEWALT®

Milwaukee®

Our tool repair technicians have a combined experience of over 80 years in the industry and offer free tool repair quotes and torque wrench calibration.
